

BE PREPARED FOR WHAT'S NEXT

SQL SERVER ASSESSMENT & HEALTH CHECK

WHO:

Company with mission critical SQL Server databases and no on-staff SQL Database Administrators.

WHAT:

Our expert-team and reliable monitoring process assess the overall health of your SQL Server environment so that we can determine strategies to help stabilize your company and optimize performance. The SQL Server Assessment and Health Check is tailored to your specific business needs. We conduct the Health Check using the following check list:

- » Assess Proper Configuration Settings
- » Evaluate Audit Logs
- » Assess Locks and Bottlenecks

The result is a Recommendations and Findings report that gives you valuable insight into the performance of your mission critical data application.

DELIVERABLE:

A Findings and Recommendations report addressing recommended improvements and next steps for mitigation of findings. It also will include continuing monitoring and mitigation strategies for possible next steps.

FOLLOW ON OFFERING

SQL MANAGED SERVICES

We offer SQL Server planning, implementation, ongoing monitoring, maintenance, and support for your business-critical SQL Server environments. Our DBA's are available 24/7 to help you improve response times, increase performance, and ease skill shortages—all while decreasing your operating costs and your risk.
